Full Stack Developer with experience in **PHP (CodeIgniter, Laravel), MySQL, JavaScript, HTML/CSS, Next.js and Astro**. Specialized in **SaaS platform development, API integrations, real-time chat systems, process automation, and subscription management**.

PROFESSIONAL EXPERIENCE

Interplan/Tomatina Cloud

Full Stack Developer

August 2023–Present

Development of a SaaS platform called *Tomatina Cloud* that centralizes multiple communication channels: WhatsApp, Facebook Messenger, Instagram, Telegram, SMS (Twilio, Clickatell), MercadoLibre, and email.

- Designed and developed internal APIs for message delivery and AI-powered bot management.
- Integrated payment and subscription systems using PayPal, Stripe, and Bitcoin Cash.
- Developed calendar and scheduling modules for automated messages and calls.
- Maintained and enhanced Interplan S.A.'s internal system for savings plan management, working on modules such as treasury, installment billing, and vendor management.

Key Achievements:

- Designed and implemented a unified messaging process that consolidated inbound and outbound communication across all channels, enabling greater future scalability.
- Built an external API allowing third-party systems and CRMs to integrate with the developed platform.

Piccadely

Logistics & Customer Service Manager / Developer-Analyst

November 2013–July 2023

- Developed internal applications and tools using JavaScript, HTML, CSS, PHP, and MySQL.
- Built internal systems to improve inventory tracking and stock management.
- Coordinated cross-functional teams to optimize production and operational processes.
- Gathered business requirements and translated operational needs to the external development team.

Reason for leaving: Sought professional growth focused on software development. IT was outsourced, and my role was primarily centered on production coordination, personnel management, and logistics.

Universidad Tecnológica Nacional

University Degree in Programming (Technical Degree)

March 2021–December 2023

Udemy

Web Development University – Frontend Web Developer

April 2022
